FW: Printing labels from scans - Estimate documentation

peiyuwu@romansunstone.com <peiyuwu@romansunstone.com>

Mon, Apr 6, 2026 at 6:09 PM

To: Rafael Hidalgo <devops@stanleycreations.com>

Cc: Wayne Cheng <wayne@istarglobe.com>, joyl@romansunstone.com, Vincent Lay <vlay@romansunstone.com>

Hi Rafael,

Attached is the Asgard technical specification, which utilizes a 'one-scan-per-label' logic. This should provide a baseline for our Shipping Label automation requirements. Please review the feasibility of this approach; if the logic is sound, we intend to develop both Shipping Label and Asgard Spec internally to avoid the 15k professional services fee quoted by the vendor.

Thanks

Peiyu

Subject: RE: Printing labels from scans - Estimate documentation

Hi Vincent,

Jann, asked me to follow-up with you.

I've attached a supporting document outlining the scope of the work involved. I'll ask Rocio to send an official estimate shortly.

Kind regards,

Isaac Shumborski
Chief Commercial Officer, Asgard Alliance Inc.

Jann,

Checking in on this since it's been a while since we talked. What's the status on developing this feature?

Sincerely,

Vincent Lay

Hi Peiyuwu,

I've just received some information from our team. Would it be possible to schedule a quick call with your team to gather more details regarding the automation print of UCC-128?

Please let us know your preferred date and time.

Best regards,

Jann Carlo Montecalvo
Director of Operations

Hi Vincent,

Automatically printing a UCC-128 label based on a scanned carton number will require development work. I am currently discussing possible approaches with the Development Team and will update you once I have more information.

Manually selecting and printing a carton number, however, is possible. This can be done by reconfiguring the UCC-128 labels and utilizing the “Print Label” checkbox. The checkbox would determine which carton number is selected for label printing.

Subject: Printing labels from scans

Jann,

At the moment, when we print our UCC-128 labels on the Shipments screen, it'll print a label for every package in the shipment at once.

We were wondering if there is a way that whenever we scanned a carton number into Acumatica, that it would automatically print the UCC-128 label for that carton alone and not any other ones.

Sincerely,

Vincent Lay
